

NO FIRE

EL NUEVO ESTÁNDAR EN CABLES DE SEGURIDAD

LE COVISA - RZ1-K NOFIRE®

CABLES FABRICADOS 100% EN
CHILE

NOFIRE® RZ1-K

Cable multi o monoconductor de fuerza, categoría A y libre de halógenos NOFIRE® (RZ1-K)

■ Norma de fabricación

IEC 60502-1, IEC 60228, IEC 60754-1, IEC 60754-2, IEC 61034-2, IEC 60684-2, IEC 60332-3-22

■ Construcción

Formación: 1-2-3-4-5 o más conductores aislados y cableados entre si, con o sin conductor de sección reducida.

Conductor: Cable flexible de cobre electrolítico clase 5.

Aislación: Polietileno de enlace cruzado de baja densidad tipo XLPE NOFIRE®, retardante a la llama, libre de halógenos, de excelentes propiedades eléctricas, buen comportamiento a agentes químicos y resistente al ozono.

Cubierta: Compuesto termoplástico libre de halógenos, baja emisión de humos, baja toxicidad, retardante a la llama y no propagador de incendio (LSOH NOFIRE®). tipo ST8 adecuado para categoría A.

Rotulado: COVISA NOFIRE RZ1-K, "sección", 0.6/1kV, 90°C, "número certificado", "orden de fabricación", "fecha" COVISA.

■ Aplicaciones

Utilizado en infraestructura crítica y/o lugares de reunión de personas, estaciones de metro, interior mina, hospitales, colegios, instituciones gubernamentales, municipales y en lugares donde se requiera que la normativa exija un grado de protección contra incendios.

NOFIRE® RZ1-K

Monoconductor RZ1-K NOFIRE®

COVISA CHILE - NOFIRE RZ1-K

Imagen referencial

- Uso industrial y domiciliario
- Tensión de servicio
- Servicio/sobrecarga /cortocircuito
- Flexibilidad
- Baja emisión gases tóxicos
- Retardante a la llama
- No propaga incendios
- Baja emisión humos opacos
- En ducto
- En bandejas
- En escalerillas
